Profile

Engineering leader who still ships. I write Go by conviction,
lead teams that own what they build, and run Snælda, a website
machine for small businesses that do not want a web project.
Currently tech lead at Ventla International AB in Göteborg.

Experience

- 2026 – now **Tech Lead** · Ventla International AB, Göteborg, Sweden
Leading a revision of the entire platform.
- Cut hosting cost in half by optimising compute spend and simplifying the stack.
 - Moved from microservices to a lean monolith with outposts where they matter, with fewer moving parts.
 - Work closely with the CEO and CFO to shape a new product strategy.
- Go · TypeScript · GCP
- 2021 – 2026 **Frontend Developer, then Full Stack Developer** · Precisely, Göteborg, Sweden
Contract lifecycle management (CLM) platform. Joined on the frontend and worked full stack for the last two years.
- Migrated the codebase from JavaScript to TypeScript.
 - Led development of the larger features, including AI chat and AI reference discovery.
 - Security work, including moving authentication to HttpOnly cookie tokens.
- TypeScript · JavaScript

2018 – 2021 Full Stack Developer, then Tech Lead · Advania, Iceland

Joined in a junior full-stack role with a frontend focus, and went on to lead the engineering of Bakvörður, an HR-tech time reporting and compliance B2B SaaS.

- With the team, merged the frontends and built a shared API layer for two separate HR-tech products.
- Tech lead for Bakvörður, owning the product's engineering as a B2B SaaS.
- Secured tenant isolation across the multi-tenant platform.
- Refactored broken workflows and led the rewrite of the platform's next iteration.
- Built all CI/CD pipelines and moved the stack from Windows servers to Azure. One main workflow built the release and rolled it out through Octopus Deploy Tentacles on each server.
- Drove the migration from ASP.NET Web Forms towards .NET Core and React.

C# · ASP.NET Web Forms · .NET Core · React · TypeScript · Azure
· Octopus Deploy

Education**2013 – 2017 BSc Computer Science · Háskóli Íslands (University of Iceland)****Skills**

Languages	Go, TypeScript, C#, SQL
Frontend	React, ASP.NET Web Forms
Platforms	GCP, Azure, Railway, Docker, Postgres, Octopus Deploy
Leadership	Tech leadership, Platform architecture, Cost optimisation, Product strategy with executives, CI/CD ownership, Security hardening

Awards**2017 Code for Course challenge winner, Digi.me DataHack**

VaxAbroad, an iOS app surfacing vaccination information for travellers.
